Poppits

Poppits is a leader in providing the easiest way to balance and maintain your pool or spa water. In addition to this, Poppits is the only form of pool and spa sanitisation that is endorsed by the Asthma Council of Australia and New Zealand with its Sensitive Choice logo, making it a Chlorine Free Alternative to managing your Pool or Spa. The Poppits brand is “The Healthy Alternative”: a chlorine and bromine free system for people concerned about asthma, sensitive skin and the environment.

The number of people suffering from asthma is growing at an alarming rate. It was reported that 1 in 4 school-age children now suffer with the ailment in Australia and New Zealand. People with allergies also account for 40% of the population. These days, most progressive households use allergy free pillows and use non-residual room deodorants – but what about spas, spa baths and swimming pools? It is now possible to use a product that is safe and effective for all spa users, inclusive of asthmatics and allergy sufferers.

About Sensitive Choice

Sensitive Choice is a community service program, developed by the National Asthma Council Australia, that aims to educate people about the importance of managing their asthma and allergies.

I have a Spa!

A spa is a small body of water of approximately 500 to 7000 litres, that is constantly agitated and kept at moderate temperatures around 26-38°C. Due to its size and temperature it has to cope with challenging and demanding conditions.

With adequate maintenance and monitoring program, the spa becomes what it is meant to be, a place to enjoy and relax.

To help you keep your spa in top condition, Poppit presents its 3 simple steps to a chlorine free spa.

Step 1.

Balance the Water.....Set your pH & Alkalinity while you clarify the water. Saves hours of treatment time by using One-Step Water Prep.

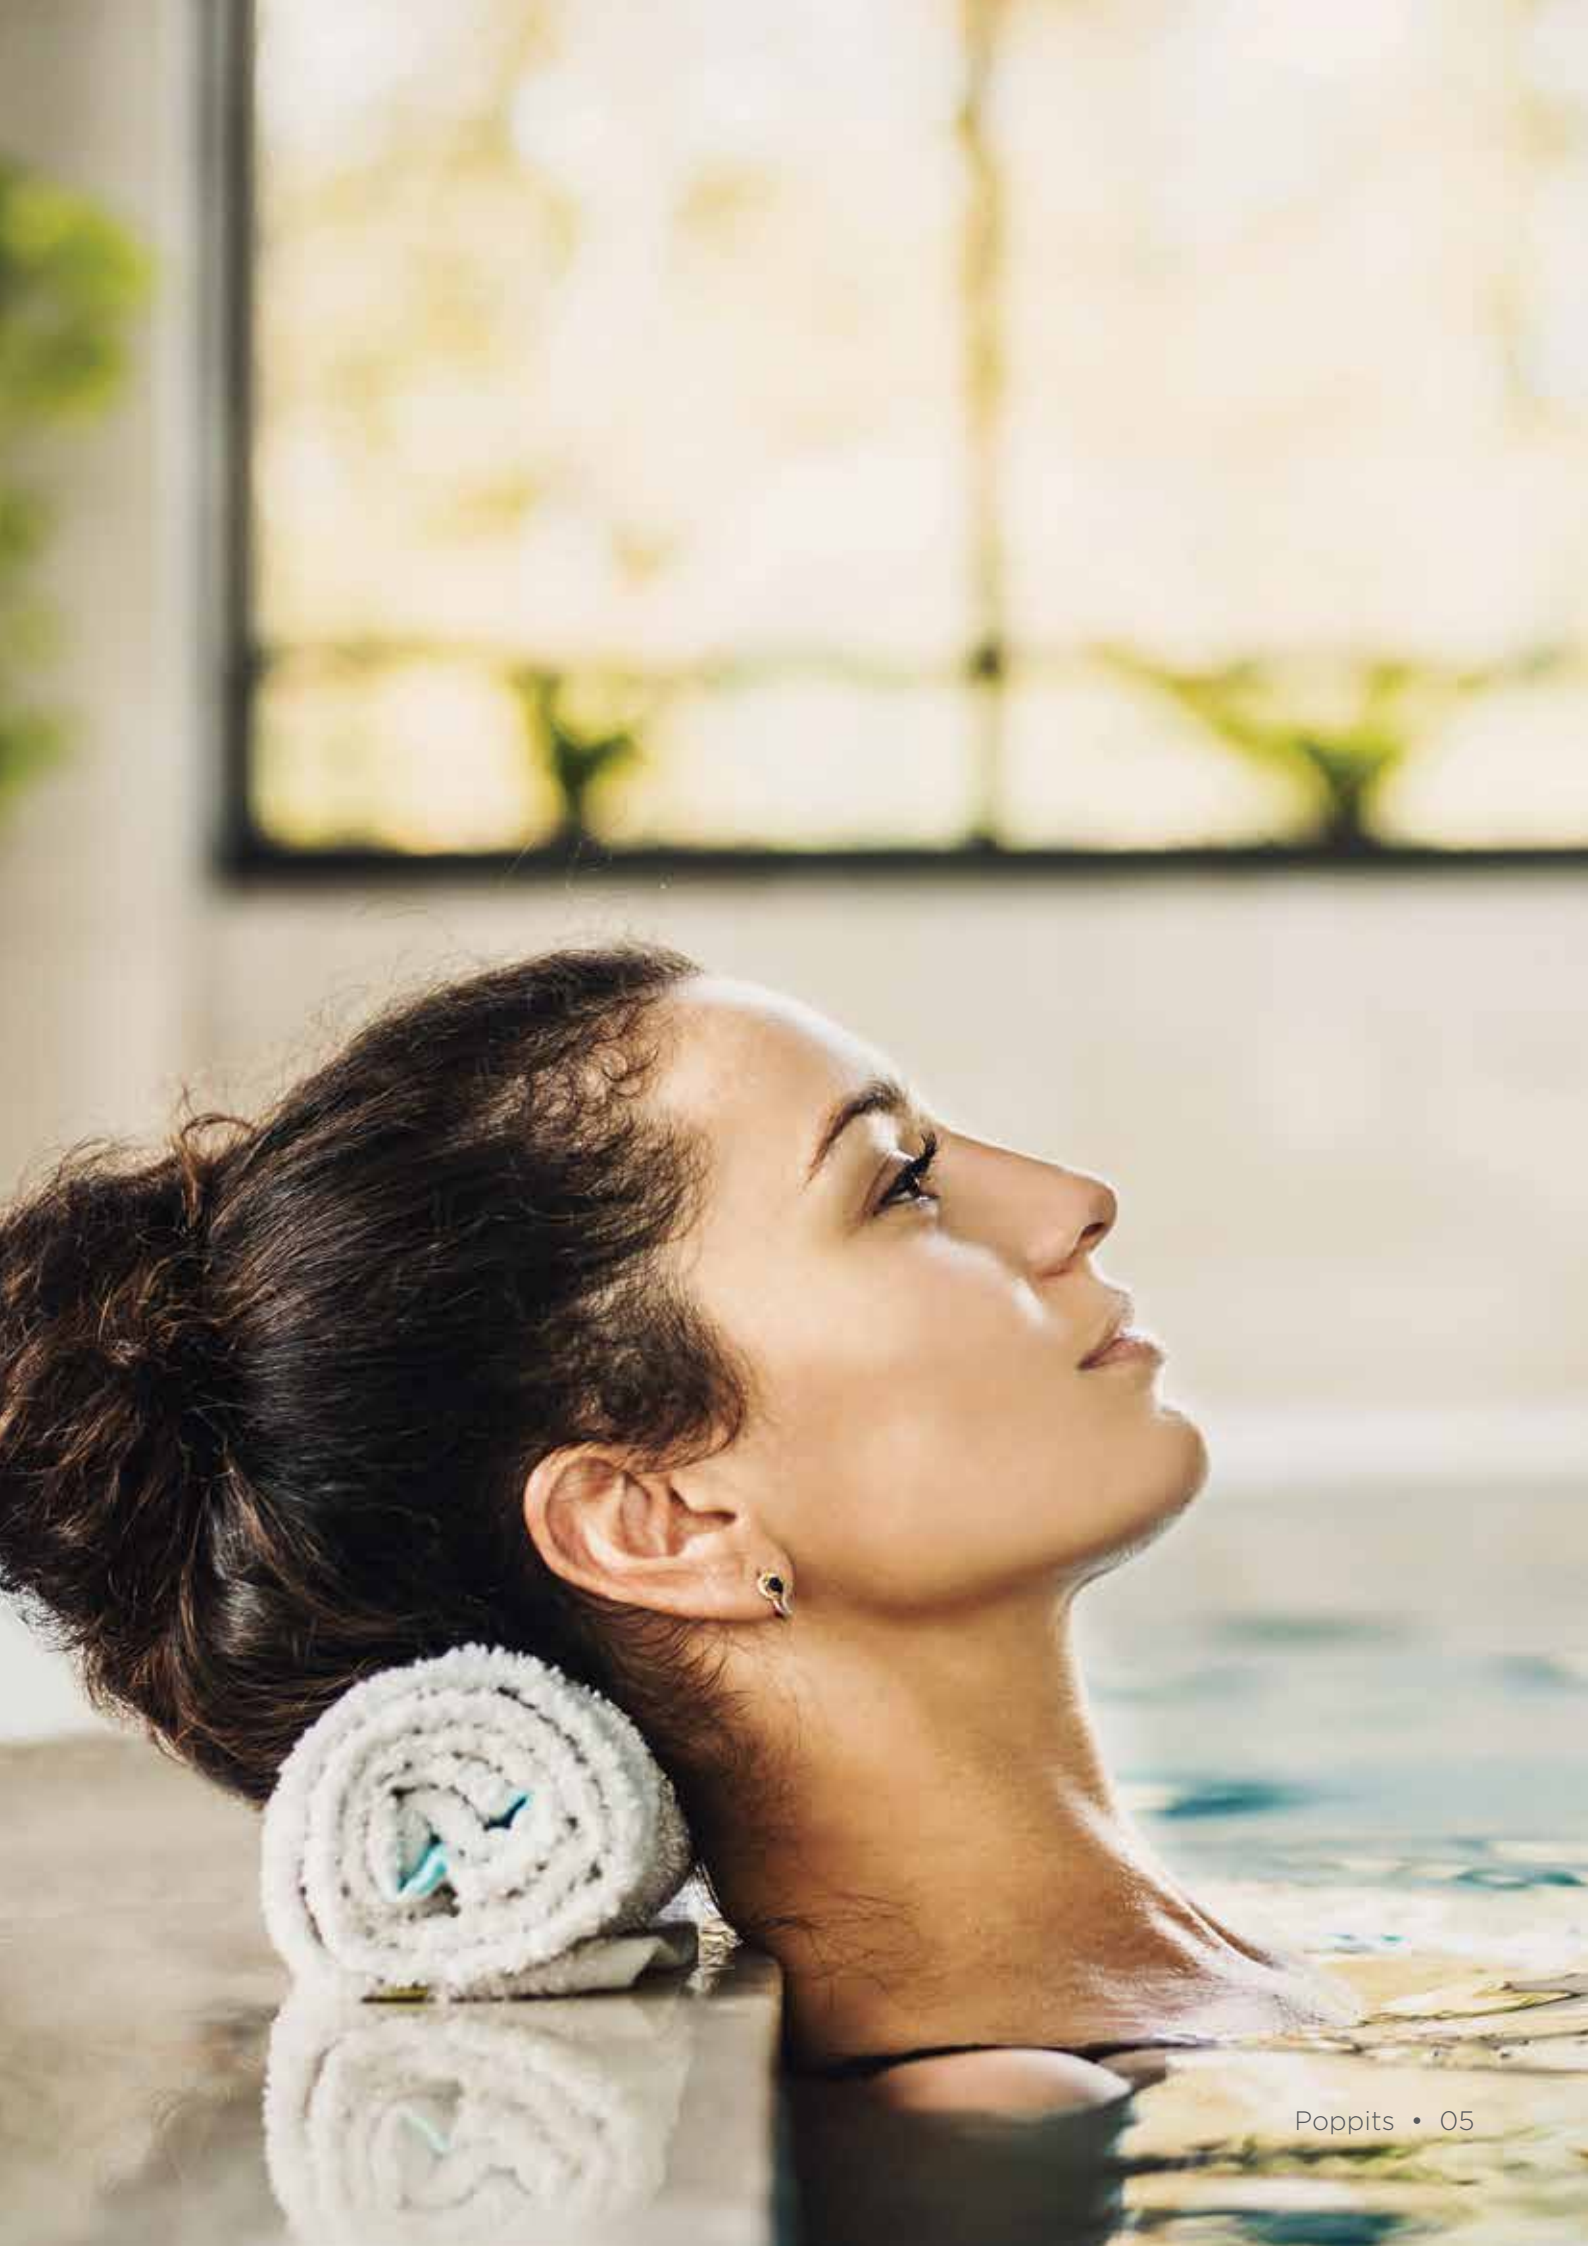

Step 2.

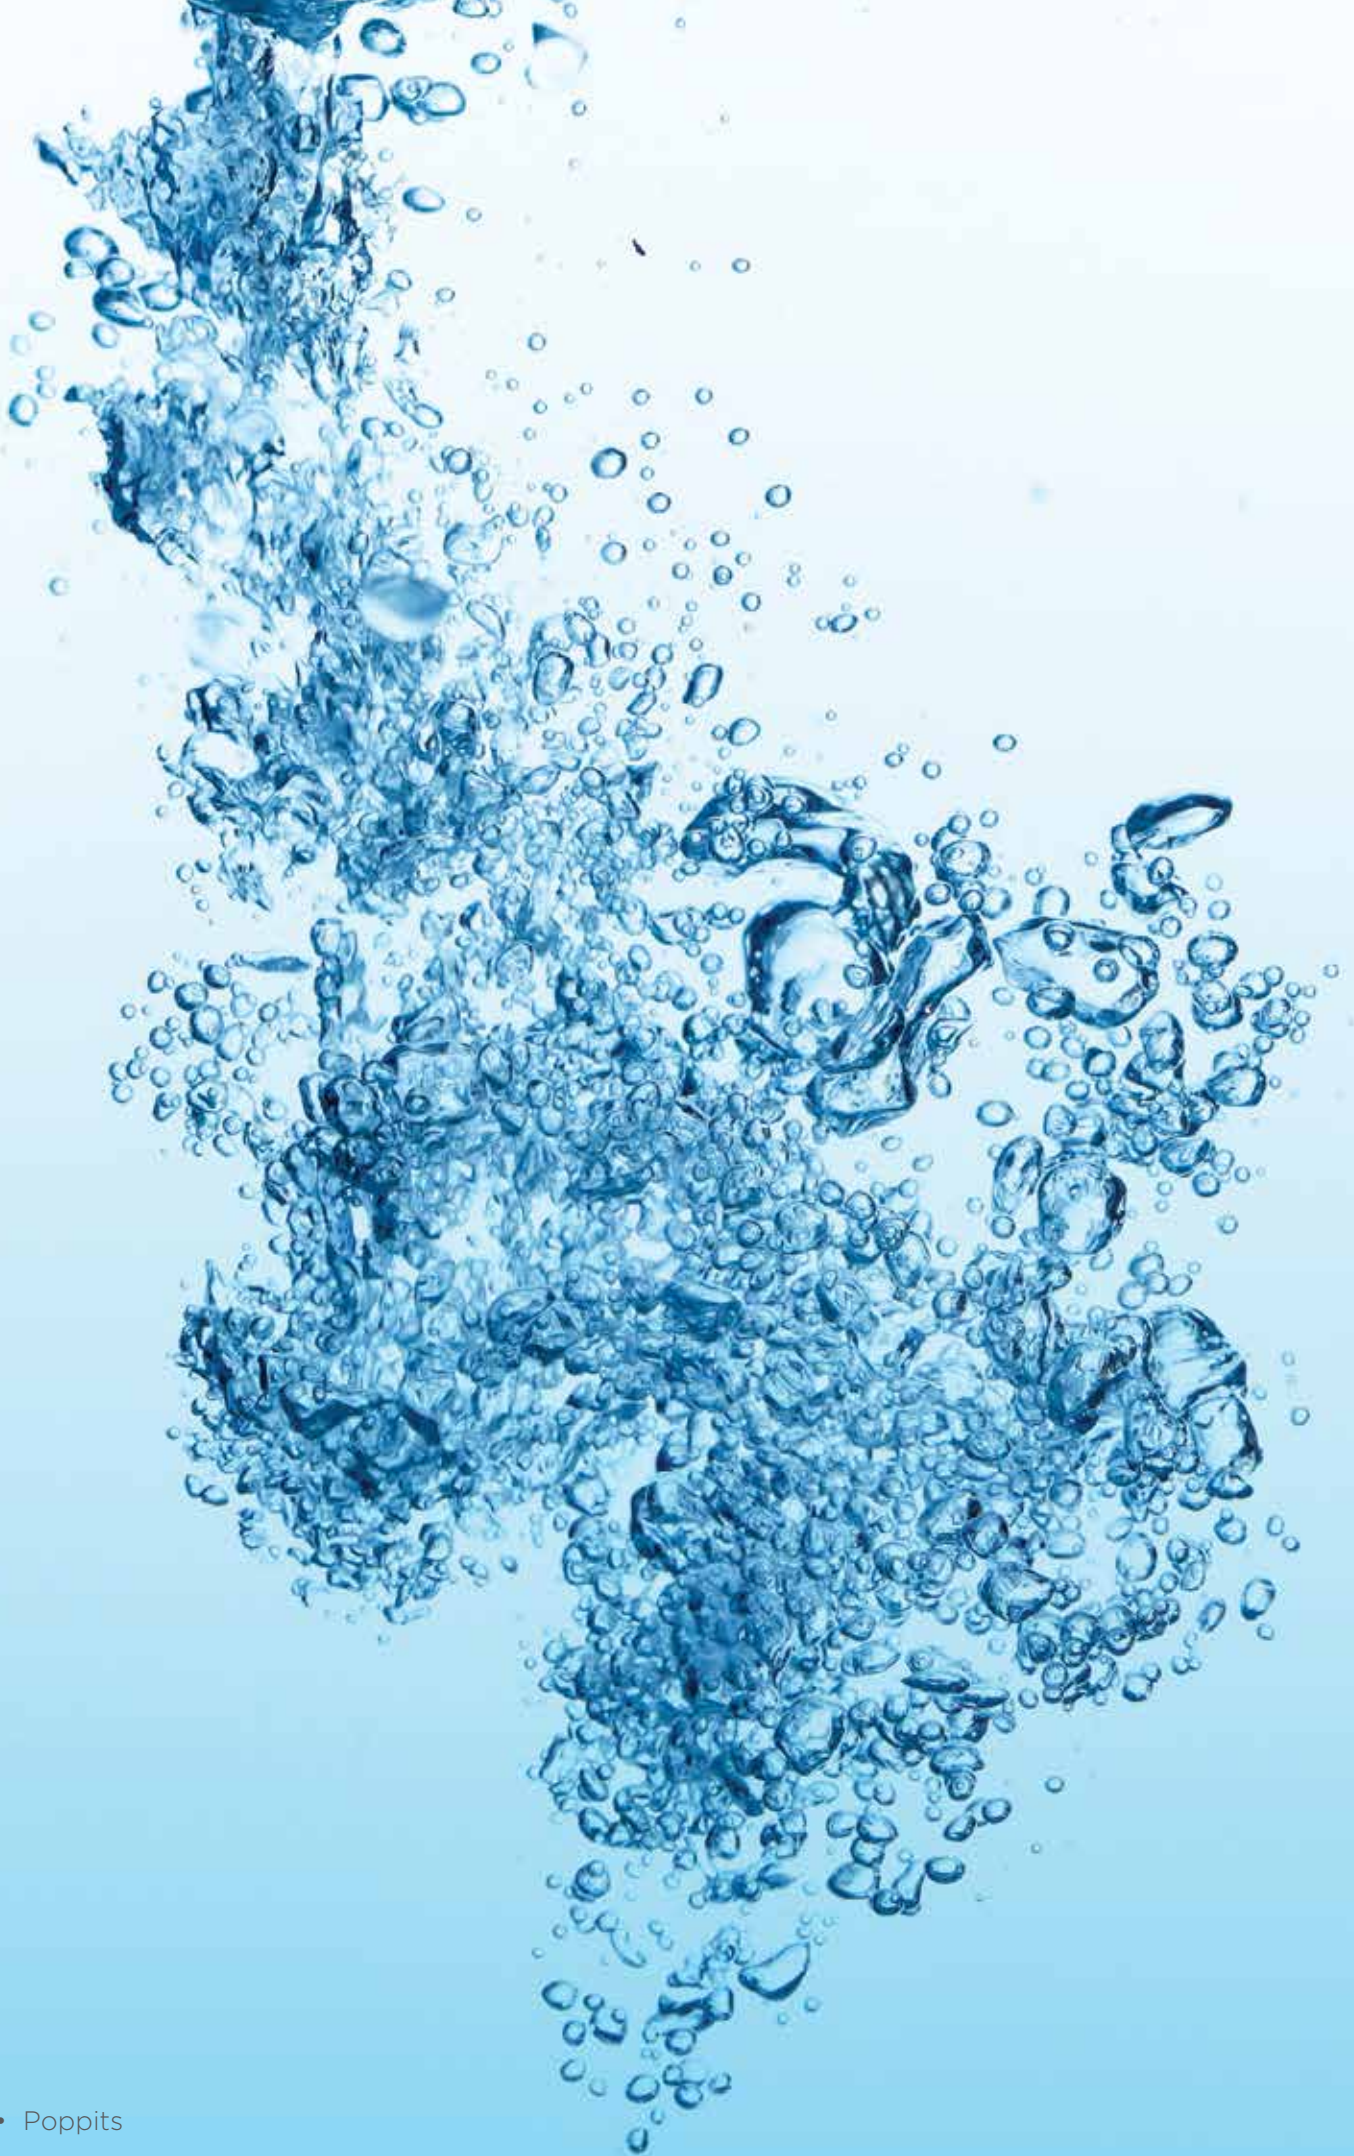

Sanitise the Water.....Unparalleled broad-spectrum disinfecting for complete peace of mind, along with significant savings by using one of our chlorine free sanitisers.

Step 3.

Maintain the Water.....Keep the water sparkling and clear by adding Poppit Complete Maintenance and Clarifier.

The system was designed to work synergistically making each of the components enhance the performance of the other two and simplify the maintenance of the Spa.

Sanitisers

Poppit sanitisers were designed for sensitive people with allergy to common disinfectants (chlorine, bromine) but without losing the vision of making them available to everyone.

Keeping your spa safe!

Poppit Spa Sanitiser

Poppit Spa Sanitiser cleans and conditions the spa in one action. It uses hydrogen peroxide to oxidise the bacteria and organic materials in spa water, while at the same time prevents the build-up of organic slime on spa walls and seats.

The advantage of the Poppit Spa Sanitiser is that it does not contain chlorine or bromine making it ideal for asthmatics and people with sensitive skin.

In fact, there is no need to shower or bath after using your spa.

Features & Benefits:

- Endorsed by the National Asthma Council
- Gentle on the skin
- Free of chlorine, bromine and salts
- Cleans and conditions the spa in one action
- Creates an oxygen enriched environment
- Helps to keep your spa water clear and odour free
- Step 3 of the Poppit Spa Management Program

Recommended for Spa with water volume between 500 and 1500 Litres.

Available Pack Size: 15L Containers

Peroxsil Chlorine Free Sanitiser

Peroxsil Chlorine Free Sanitiser uses the synergy between silver and hydrogen peroxide to achieve the ultimate level of disinfection in spa and pool water. The combination of both components oxidizes any bacteria or organic matter that may be present in the pool or spa water.

Endorsed by the National Asthma Council

- Endorsed by the National Asthma Council
- Gentle on the skin
- Free of chlorine, bromine and salts
- Cleans and conditions the spa in one action
- Creates an oxygen-enriched environment
- Helps to keep your spa water clear and odour free
- Step 3 of the Poppit Spa Management Program
- Measurable and Predictable
- Economical - Simple to use
- Conveniently marked and designed 1L litre jerry can with up to 100mls on the chamber

Recommended for Spa with water volume between 1500 and 7000 Litres

Available Pack Sizes: 1 Litre conveniently designed and marked jerry can
5 Litre jerry can, 15 Litres drums

Healthy Alternative for a Sparkling Clean Chlorine Free Spa!

Balancing and Maintenance

Spa water is treated more rigorously than pool water. While the heat and turbulence create a relaxing environment for the spa user; these conditions are not quite as “friendly” to spa fixtures. There is a need to set and maintain the correct spa water balance to ensure that the water remains silky to the skin and gentle to the spa’s surface.

Improving spa performance!

Poppits One Step Water Prep

Poppit One Step Water Prep is the start of the Water management system.

It sets the pH and alkalinity of the spa water in one go.

Its unique formula not only set the pH and alkalinity but also keep them steady for up to 16 weeks minimising the addition of balancing chemicals, saving time, water and money to the spa owners.

- Sets pH and Total Alkalinity in one dose.
- pH and Alkalinity remain constant for period of up to 12-16 weeks
- Dosage rates available in start-up Procedure Card
- Save time
- Save money
- It is classified as non-dangerous good
- Conveniently marked and designed 1L liter jerry can with up to 100mls on chamber
- Dosage are indicated in start-up procedure card

Available Pack Sizes: 1L conveniently designed and marked jerry can, 2.5L jerry can, 5L drums

Poppit Spa Complete Maintenance and Clarifier

Its unique and patented formula enhance the efficiency of the Poppit's sanitisers (in fact any sanitiser) by reducing it load. Poppit Spa Complete Maintenance and clarifier reduces phosphate and at the same time act as clarifier of the spa water, making it the product to go for regular maintenance, after a party or heavy use of the spa.

- Enhance and work in synergy with Poppit's sanitisers
- Keeps water crystal clear
- Removes phosphates
- Controls algae
- It is classified as non-dangerous good
- Conveniently marked and designed 1L liter jerry can with up to 100mls on chamber
- Dosage are indicated in start-up procedure card Lengthens the life of the Spa water

Available Pack Sizes: 1L conveniently designed and marked jerry can, 5L drums

After its use is recommended to clean spa filter cartridge.

Poppit Water Balance

Balances water, protects your equipment and enables bactericides to perform at maximum effectiveness. Poppit Water Balance raises pH and alkalinity of spa water.

It has been formulated to protect heat exchangers from the damaging effects of scale and corrosion.

Available Pack Size: 1kg and 500g containers

Poppit Spa Cal Hardener

Poppit Spa Cal Hardener will increase water hardness which prevents etching, pitting and corrosion of spa surfaces and metallic components

Available Pack Size: 500g Containers

Poppit pH Reducer

Poppit pH Reducer is used to lower the pH level of the spa pool water to a desired level.

Available Pack Size: 750g Containers

Poppit Filter Cartridge Cleaner

Poppit Filter Cartridge Cleaner cleans and degreases your filter cartridges by oxidising (burning up the fats) without harming the filter cartridge. Regular usage of Poppit Filter Cartridge Cleaner (every 1-2 weeks) will prevent cloudy, smelly spa water and prolong the life of the filter cartridge.

Features & Benefits:

- Suitable for most filter cartridges in Swimming pool & Spas
- Cleans body fats and dirt away without chlorine residue

Available Pack Size: 1kg Containers

Clean filter cartridge every 1-2 weeks, depending upon spa usage.

Poppit Spa Pipe Degreaser

Ideal for cleaning water pipes around Spas removing body fats, algae, shed skin and hair which accumulate in the spa pipes after spa use.

- Removes unhygienic body grease build up from pipes
- Prevent a build-up of grease and body-fats in spa pipe systems.
- Poppit Spa Pipe Degreaser is used to clean the pipes around the spa
- Removing Body fats, algae and other debris that is accumulated in the pipes

Available Pack Sizes: 500mL Container

Always use Poppit Spa Pipe Degreaser just before dumping the spa water!

You should dump your Spa water every 12-16 weeks for a sparkling clean Spa.

Spa Clarifiers

Cloudy spas are arguably the most common problem in Spa maintenance.

Spas can be perfectly clear one day and cloudy the next and this becomes a spiralling problem if not addressed correctly.

The Poppits range include clarifiers specifically designed to work in synergy with the chlorine free sanitisers.

Keeping your spa sparkling!

Poppit Quick Fix

Water supplied by water authorities generally contains chlorine in various amounts, which are often dependent upon the water table level and local conditions. There will always be a chlorine concentration as well as other organic and inorganic matter present in the water.

POPPITS brand - Quick Fix - chlorine free oxidiser is used to oxidise or “burn up” these contaminants and leave the water free from chlorine and ready to be balanced and then sanitised.

Poppit Quick Fix is recommended during the initial start-up of your new spa and also for weekly maintenance.

Features & Benefits:

- Chlorine free oxidiser
- Ideal for the regular cleaning and maintenance of spas as well as those in need of a quick clean up
- Oxidises organic material

Available Pack Size: 1kg and 475g Containers

Poppits Liquid Clarifier

Very occasionally, when a lot of bathers have been using the spa and perhaps debris has been carried into the spa, it may be necessary to clarify the water to assist in clearing the water and restoring its natural sparkle.

- Saves time – No need to raise pH
- Works fast usually within 24 hours
- Simple 4-step procedure
- Effective, clears murky and cloudy water
- Can be used at any time of the year.
- Regular use will improve filter efficiency and maintain sparkling pool water

Available Pack Sizes: 1L Container
